

Hydroxyzine

Why has my veterinarian prescribed this medicine?

Hydroxyzine is an antihistamine. Antihistamines are used to relieve or prevent the symptoms of allergy. Your veterinarian may prescribe this medication to prevent itching in your dog or cat. This medication has sedative properties.

How do I give this medication?

- Give this medication to your pet as directed by your veterinarian. **READ THE LABEL CAREFULLY.**
- If the medicine is a liquid, measure the dose with reasonable care.
- Try to give this medication at about the same time(s) each day.
- **DO NOT** give the pet more medicine than directed.
- **DO NOT** give the medicine more often than directed.
- Try not to miss giving any doses.

What do I do if I miss giving a dose?

Give the dose as soon as possible. If it is almost time for the next dose, skip the missed dose, and continue with the regular schedule. Do not give the pet two doses at once.

How do I store this medicine?

- Keep this medicine out of reach of children.
- Store this medicine in a cool, dry place at room temperature. Store away from heat and direct sunlight.
- Do not store this medicine in the bathroom, near the kitchen sink or in damp places. The medicine may break down if exposed to heat or moisture.

What are the potential side effects?

"The most likely side effect of this medication is sedation."

- The most likely side effect of this medication is sedation. This effect may decrease with time.
- Your pet may develop fine rapid tremors, whole body tremors and rarely, seizures. Notify your veterinarian if these effects occur.
- Other side effects may occur. If you notice anything unusual, contact your veterinarian.

Are there any possible drug interactions?

- Make sure to **tell your veterinarian** if you are giving your pet any other medication or supplements.
- Quite often, your veterinarian may prescribe two different medications, and sometimes a drug interaction may be anticipated. If this occurs, your veterinarian may vary the dose and/or monitor your pet more closely.
- The following drugs can potentially interact with hydroxyzine: CNS depressants, anticholinergic agents, and epinephrine.
- **Contact your veterinarian** if your pet experiences any unusual reactions when different medications are given together.
